INTEGRATE TEACHING STRATEGY

Name of Curriculum: DOL

Grade Level: 7th

Where in the curriculum will you include a CER learning task (e.g. topic, lesson, pages)?

DOL → lesson # 10 →

"Bacteria & Mold Testing" activity in Kingdoms of Life

What question will you ask students?

Which ^{school} surface ^{supports} contained the most microscopic growth? ~~microscopic growth?~~

Write an example of the Claim, Evidence, and Reasoning (if applicable Rebuttal) that you would like your students to construct.

Claim : The ~~door~~ door handles contain the most bacteria.

Evidence : I estimated the % of growth on 4 surfaces & the door handles contained the most. I also saw that those results were the same for 4 different lab groups.

Reasoning : I collected multiple pieces of evidence to support my claim. I also identified them on the FOSS website.
